DETAILED ACTION

Continued Examination

1. Request for Continued Examination, filed December 7, 2006, has been acknowledged and entered.

Claim Rejections - 35 USC § 102/103

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were

Art Unit: 1734

made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 9, 11, 12, 14 through 18, 20, 21, 23, 24, and 25 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Oka et al. (US 5,976,297).

With respect to claims 9, 11, 12, 14, 15, 16, 18, 20, 21, 23, and 24, Oka et al. teach forming an antireflection film, where a functional coating dispersion (2), comprising a solution of particles such as titanium oxide (TiO₂) or ITO without resin, is applied to a release film (1), applying an adhesive or uncured resin layer (4) over the coating (abstract; column 2, lines 4-7; column 12, lines 7-8 and lines 24-25; column 53, lines 31-50). The coated release film is then press-bonded and cured onto a substrate (3) at 40°C, and the release film is removed thereafter (column 10, lines 49 - 65; column 55, lines 19-22; Figure 5)

With respect to claims 17 and 25, Oka et al. teach providing functional particles in the coating with an average particle diameter of no more than 200 nm (column 12, lines 26-32).

Furthermore, by applying a solution of particles with an average particle diameter of no more than 200 nm and press-bonding, it is obvious that a compressed microparticulate is formed, which does not have cracks and is especially capable of

Art Unit: 1734

being drawn 10% without forming cracks, exhibiting a surface resistivity at most 10 times greater than the surface resistivity prior to drawing.

“Where the claimed and prior art products are identical or substantially identical in structure or composition, or are produced by identical or substantially identical processes, a *prima facie* case of either anticipation or obviousness has been established.” *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977) (see MPEP § 2112.01)

Allowable Subject Matter

5. Claims 10 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 9 through 25 have been considered but are moot in view of the new ground(s) of rejection.
